# CSC Required Minimum Configurations December 2012
Contact your CAMA Advisor for assistance before ordering a new system
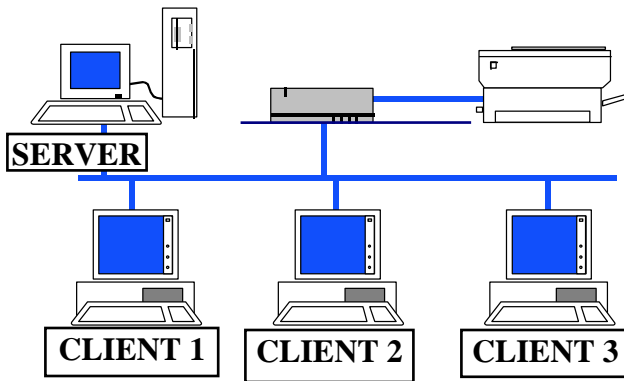

Stand-alone configuration

Software Requirements:
- Windows XP Professional or Windows 7 **32-bit ONLY**
- Microsoft Access 2003, 2007 or 2010 (**full** installation including all components, especially the Linked Table Manager) is required for running CSC Tax Admin or Personal Property applications
- Internet Security software (anti-virus, firewall, anti-spyware)
- Access to email for remote support

Hardware minimums:
- 2GB RAM
- 160+ GB hard drive – larger capacity recommended if storing photos
- 32-bit processor recommended; if purchasing a 64-bit processer, the Windows operating system must be 32-bit for a stand-alone system
- High-speed Internet connection is required for remote support
- Read-write capable CD or DVD drive or removable hard drive or USB flash drive for data backup
- Laser printer

Server Configuration

DISCUSS YOUR PURCHASE PLANS AND BUSINESS NEEDS WITH DLS IT STAFF BEFORE ORDERING!

SERVER

CLIENT 1   **CLIENT 2**   **CLIENT 3**

Server Software: Microsoft Windows Server 2003 or 2008 – up to 2008 R2. **Please note: Oracle cannot be installed if the server is a primary domain controller.** The Oracle installation can take place prior to promoting the server to PDC status.

Clients: same minimums as stand-alone configuration (see above) **except** client PCs can have either 64-bit Windows 7 or 32-bit Windows 7 installed.

Server minimum hardware:
Depends on a great many variables; contact your CAMA Advisor for assistance. 64-bit servers are acceptable.

IN GENERAL:
- Buy the fastest processor, the most RAM and the largest capacity hard drive you can afford.
- PLEASE send quotes to your CAMA Advisor for review before ordering. Purchasing something we can't support may be costly.
- Everything changes when the CSC Cloud version becomes available. Call us for details.
